Mockup A:

What works:

- Like the color scheme
- Font
- Timeline → like how user intuitive it is and the line down the middle
- I like the little blurbs in the learn more section and having the buttons

What needs to change:

- Try adding pictures to the timeline and making the text a little smaller
- Try making the boxes and background in learn more section different color to make the boxes more striking

Mockup B:

What works:

- I also like the font
- I like having images in the timeline
- I prefer the 'learn more' section in part b. I like that it's horizontally oriented as opposed to vertically oriented in part b, because there's already a lot of scrolling with the timeline in the home page.

What needs to change:

- Having the headlines for each section of the timeline be a bit bigger so that it contrasts more with the body text

Other ideas:

- overlaying patterns over the background to add extra dimension/detail
